WHIST PARTY DOES "BIT"

Godowsky Recital at Acolian Hall Thursday One of Week's Contributions for Soldiers.

Word brought to the smoke fund by large contractors of Government work is to the effect that their employees are getting very anxious to figure among the deport to THE SUN Tobacco Fund. In certain cases, where the work under contract is approaching completion, some of it as carly as April 1, the men are really nervous for fear the period of their Government labors will expire besending the "makins" over to the American soldiers in France have been American solders in France have been brought to a head and they want to come into the fund as a sort of official body, Federally so recognized. This desire is described as being general among ell the workers employed on such contracts in the vicinity of New York.

It is immensely gratifying to the pro-moters of the fund, and tiss almost uniresal wish among men who are, by movements to collect money for any cause proves, if proof were necessary, how popular is This Sun Tobacco Fund and how limitless is its appeal. Among the employees on the kind of contract work referred to are the 10,000 men em pioped by Hanger & Mason in the Newmatter to the attention of their emplayers with such persistency that the latter have chosen a day next week when their wishes are to be gratified and they will shortly after have the

thousands of people who are destrous selping the soldiers to smokes and the same time refreshing their souls by hearing some exquisite music. This date is Thursday evening, March 21, and the place is Acollan Hall. A glance at the programme which follows will rewhat a rare musical treat is in more for those who attend:

The Sun Smoke Fund will receive the gross receipts from this recital, as there will be no expenses. As soon as the great Polish planist had expressed his wish to do "something personal" for the selders there was an instant desire of his managers and the management of Aselian Hall to be in with him. The former donate their services and the latter gives the hall. Is there any chance a inusic lover who realizes what chopin interpreted by Godowsky means
